

MICROCEMENTO®

TOPCRET

Topcret Guarantee and Insurance Program.

Topcret is the only manufacturer and installer company of high quality coatings which guarantees in writing the quality of the product and the installation of Microcemento.

Topcret uses high quality raw materials, designs its products in its own laboratories, manufactures them in its facilities and applies them with its specialized and highly trained personnel: all by following the highest quality standards. This guarantees the complete traceability of the process from start to finish.

The Topcret Guarantee and Insurance Program guarantees both the high quality of its products and their application.

MICROCEMENTO®

Microcemento® is a smooth, cement-based and polymer coating. Only 2mm thick and thanks to the great adhesive qualities that it displays on multiple surfaces, it is ideal for refurbishments in which without having to remove the existing material a swift renovation can be achieved saving time and money.

Microcemento is a fine and versatile material that enables the creation of unique spaces that are full of colour. It is possible to cover floors, walls and all types of surfaces in an exclusive way, which is why the micro-coating is chosen by interior designers to give quality and distinction to all spaces.

Available in a wide range of colours.
